Guest List

POS innovation

Guest List lets you say goodbye to bulky, awkward pagers and notify your customers that their tables are ready via text or voice messages. Restaurant managers and hostesses will appreciate the convenience of checking reservations, waiting guests, and table status at any time by using the Guest List mobile app.

Benefits

- **Manage Reservations:** Sync reservations made via phone or online, noting special requests, and ensure your staff is informed of cancelations in real-time.

- **Improve Service:** With our app that your hosts can access from a stationary or mobile device, they can be ready to deliver delightful dining experiences from the moment your guests arrive.

- **Decrease Wait Time:** Cut precious minutes off wait times by better managing your wait list with Guest List, keeping customers happier and maximizing revenue potential.

- **Integrate with POS:** By integrating Guest List with your point of sale system, all of your important systems share data and work together.

Features

- **Special event scheduling**

- **Staff rotation**

- **Table properties**

- **Search and sort**
