

With Mobile Manager, you can access point of sale data with your Apple or Android mobile device or your smartwatch. This cloud-based solution gives you 24/7 remote management capabilities and enables you to receive real-time alerts when your business needs your attention or when your staff needs to contact you.

## Benefits

- **Manage from Anywhere:** The true benefit of any mobile management system is its ability to give you visibility into the activity at your restaurant when you aren't around.
- **Historical Reporting:** In addition to real-time reporting, Mobile Manager provides historical data for comparison over time and to help you spot positive or negative trends.
- **POS Integration:** Direct access to sales, labor, inventory and purchasing information helps you monitor performance at your restaurant and make informed, cost-effective decisions that help your bottom line.
- **Fix Issues Quickly:** Don't be the last to know about what is happening — give your team a reliable way to contact you and address problems as soon as they arise.

## Features

- **Mobile -friendly**
- **Cloud-based**
- **Email or text alerts**
- **Data and status reports**
